Jeroo Methods Test1

1. Write a user defined method named **skip** that instructs a Jeroo to hop, plant, hop, plant, and hop.

2. Complete the `main` method below so that bob calls the `skip` method defined above.

```
method main()
{
    Jeroo bob = new Jeroo();

    _____
}
```

3. Identify the error in the following user defined method.

```
method farm()
{
    bob.plant();
    bob.turn(RIGHT);
    bob.hop();
    bob.plant();
}
```

Which of the following best describes the error?

A) farm should be capitalized.
B) A semicolon is missing after the method name.
C) Dot notation is not used within a user defined method.
D) The word method should be replaced with the word main.

Answer Here: _____

4. Write a user defined method named **disableNet** that will instruct a Jeroo to toss a flower on to a net directly in front of it and then hop forward one space.

5. Complete the `main` method below that will instruct both `jack` and `jill` to carry out the **disableNet** behavior defined above. Assume that a net is directly in front of each Jeroo.

```
method main()
{
   Jeroo jack = new Jeroo(5);
   Jeroo jill = new Jeroo(1, 0, EAST, 5);

   _____

   _____

}
```
